This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (Currently amended) A composition comprising <u>an isolated</u> Competence Stimulating Peptide (CSP) and sucrose, <u>wherein the CSP comprises SEQ ID NO:1</u> or a modification thereof, wherein the CSP is capable of preventing attachment of *S. mutans* to teeth.
- 2. (Original) The composition according to claim 1, further comprising at least one substance selected from the group consisting of an orally acceptable carrier, an anti-caries agent, and mixtures thereof.
- 3. (Original) The composition according to claim 1, further comprising an orally acceptable carrier and an anti-caries agent.
- 4. (Original) The composition according to claim 1, wherein the CSP in the composition is present in an amount from about 0.05% to about 30% w/w.
- 5. (Original) The composition according to claim 1, wherein the composition is in a form selected from the group consisting of a mouthwash solution, an abrasive dentifrice gel, a chewing gum, a nonabrasive dentifrice gel, a nonabrasive gel composition, and a soft drink.
- 6. (Original) The composition according to claim 2, wherein the anti-caries agent is selected from the group consisting of water insoluble noncationic antimicrobial agents, non-steroidal anti-inflammatory drugs, fluoride reagents, histidine-rich polypeptides, casein, urea, calcium lactate, calcium glycerophosphate,

PATENT 89188.0046

non-immunogenic amino acid segments of proline-rich proteins, monoclonal

antibodies of S. mutans.

7. (Withdrawn) A method of treatment or prophylaxis of a condition

associated with the attachment of S. mutans to teeth of a subject, comprising the

step of administering to the subject a composition containing CSP in an amount

effective to reduce the attachment of S. mutans to teeth.

8. (Withdrawn) The method of claim 7, wherein the composition further

comprises at least one substance selected from a group consisting of sucrose, an

orally acceptable carrier, an anti-caries agent, and mixtures thereof.

9. (Withdrawn) The method of claim 7, wherein the composition further

comprises sucrose.

10. (Withdrawn) The method of claim 7, wherein the composition further

comprises sucrose, an orally acceptable carrier, and an anti-caries agent.

11. (Withdrawn) The method of claim 7, wherein the CSP in the composition

is present in an amount from about 0.05% to about 30% w/w.

12. (Withdrawn) The method of claim 7, wherein the condition is selected

from the group consisting of dental caries or endocarditis.

13. (Withdrawn) The method of claim 8, wherein the anti-caries agent is

selected from the group consisting of water insoluble noncationic antimicrobial

agents, non-steroidal anti-inflammatory drugs, fluoride reagents, histidine-rich

polypeptides, casein, urea, calcium lactate, calcium glycerophosphate, nonimmunogenic amino acid segments of proline-rich proteins, monoclonal antibodies of

S. mutans.

14. (Currently amended) A medicament for the treatment or prophylaxis of

a condition associated with the attachment of S. mutans to teeth, comprising an

isolated CSP in an amount effective to reduce the attachment of S. mutans to teeth,

wherein the CSP comprises SEQ ID NO:1 or a modification thereof.

15. (Original) The medicament of claim 14, wherein the medicament further

comprises at least one substance selected from a group consisting of sucrose, an

orally acceptable carrier, an anti-caries agent, and mixtures thereof.

16. (Original) The medicament of claim 14, wherein the medicament further

comprises sucrose.

17. (Original) The medicament of claim 14, wherein the medicament further

comprises sucrose, an orally acceptable carrier, and an anti-caries agent.

18. (Original) The medicament of claim 14, wherein the CSP is present in an

amount between about 0.05% to about 30% w/w.

19. (Original) The medicament of claim 14, wherein the condition is selected

from the group consisting of dental caries or endocarditis.

20. (Original) The medicament of claim 15, wherein the anti-caries agent is

selected from the group consisting of water insoluble noncationic antimicrobial

agents, non-steroidal anti-inflammatory drugs, fluoride reagents, histidine-rich polypeptides, casein, urea, calcium lactate, calcium glycerophosphate, non-immunogenic amino acid segments of proline-rich proteins, monoclonal antibodies of *S. mutans*.

- 21. (New) The composition according to claim 1, wherein the CSP comprises SEQ ID NO:1.
- 22. (New) The medicament according to claim 14, wherein the CSP comprises SEQ ID NO:1.
- 23. (New) A composition comprising an isolated Competence Stimulating Peptide (CSP) and sucrose, wherein the CSP consists of SEQ ID NO:1.
- 24. (New) A medicament for the treatment or prophylaxis of a condition associated with the attachment of *S. mutans* to teeth, comprising an isolated CSP in an amount effective to reduce the attachment of *S. mutans* to teeth, wherein the CSP consists of SEQ ID NO:1.
